Hyderabad, India

SUMMARY

Result-driven **Data Analyst** with 3 months of internship experience at Vangrotech, specializing in **Python**-based data transformation and **SQL**-driven business intelligence. Successfully architected end-to-end data workflows that improved data readiness by **25%** and engineered **Power BI** dashboards that accelerated executive decision-making cycles by **15%**. Expert in translating complex multi-source datasets into actionable growth strategies, with a proven ability to reduce reporting errors and enhance cross-functional data accuracy through standardized reporting protocols

TECHNICAL SKILLS

Languages: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, Java
Data Analytics: Data Cleaning, Preprocessing, Exploratory Data Analysis (EDA), Trend Analysis
BI & Visualization: Power BI, Tableau, Advanced Excel Dashboards
Tools & Databases: MySQL, SQLite, Git, GitHub, Jupyter Notebook,
Soft Skills: Analytical Thinking, Technical Communication, Problem Solving

WORK EXPERIENCE

Vangrotech Tech Pvt Ltd [\[Offer Letter\]](#) Oct 2025 – Jan 2026
Junior Data Analyst Intern Hyderabad, India

- Engineered end-to-end data collection and transformation workflows using **Python** and **SQL** to prepare large-scale datasets for business intelligence.
- Performed rigorous **Exploratory Data Analysis (EDA)** and validation to identify performance gaps and provide actionable growth insights.
- Developed interactive **Power BI** and **Excel** dashboards to track key performance indicators (KPIs) for internal stakeholders.
- Collaborated on report standardization initiatives, significantly enhancing data accuracy and reporting clarity across the team.

KEY PROJECTS

Heavy Vehicle Fuel Consumption Prediction | Python, Numpy, Pandas, TensorFlow, Scikit-learn [\[GitHub Link\]](#)

- Built a high-accuracy prediction system achieving **91% accuracy** using advanced Machine Learning models.
- Reduced feature engineering latency by **15%** by automating telemetry data ingestion (speed, road grade, and stops).
- Deployed a **Tkinter-based dashboard** that provided real-time training feedback, improving model iteration speed for the development team.

Car Sales Analysis Project | Python, Pandas, Power BI, SQL, Data Visualization [\[GitHub Link\]](#)

- Analyzed large-scale car sales dataset to identify revenue trends, customer demand patterns, and regional sales performance, improving business insight visibility by **40%**.
- Developed KPIs including **Total Sales, Average Selling Price, Units Sold, YoY Growth, and Regional Sales Contribution** using Python and Power BI dashboards.
- Performed data cleaning, feature engineering, and exploratory analysis to reduce data inconsistencies by **25%** and improve reporting accuracy.
- Built interactive dashboards to visualize sales by model, body type, region, and time trends, enabling data-driven decision-making for pricing and inventory optimization.

EDUCATION

TKR College of Engineering and Technology Hyderabad, India
B.Tech in Computer Science Nov 2021 – May 2025

- Academic Performance: **CGPA: 7.55**

CERTIFICATIONS

NPTEL (IIT Certified): Java Programming (OOPs, Data Structures)
Coding Raja Technologies: Python Internship
Udemy: Python Programming
