SUMMARY

Detail-oriented Data Analyst with hands-on experience in SQL, Python, and Power BI. Track record of reducing data discrepancies by 25%, cutting report retrieval time by 30%, and building interactive dashboards that enable data-driven decisions. Skilled in ETL workflows, KPI development, and delivering clean, accurate reports to cross-functional stakeholders under tight deadlines.

SKILLS

Programming: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), SQL (MySQL), Java

Data Analytics: ETL, Data Wrangling, EDA, Statistical Analysis, Data Modeling, KPI Development

BI & Visualization: Power BI (DAX, dashboards), Microsoft Excel (Pivot Tables, XLOOKUP, Power Query), Tableau

Tools & Core Skills: Jupyter Notebook, Git, GitHub, VS Code | Requirement Analysis, Problem Solving, Stakeholder Communication

WORK EXPERIENCE

Vangrotech Tech Pvt Ltd

Oct 2024 – Jan 2025

Junior Data Analyst Intern

Hyderabad, India

- Performed data quality validation by reconciling automated and semi-automated reports against source data, ensuring 100% accuracy across multiple business units prior to stakeholder delivery.
- Authored complex SQL queries (JOINS, CTEs, subqueries, window functions) to extract and consolidate multi-source datasets, reducing manual data retrieval time by ~30%.
- Identified and resolved recurring data inconsistencies, standardizing validation processes and reducing discrepancies by 25%, improving stakeholder confidence in delivered reports.
- Built and maintained interactive MIS dashboards in Power BI and Advanced Excel (Pivot Tables, KPIs, slicers), enabling real-time performance monitoring and data-driven decision-making.
- Automated recurring manual reports using Python (Pandas), reducing report turnaround time and maintaining zero missed deadlines across a 3-month reporting cycle.

KEY PROJECTS

Bank Churn Analysis Dashboard | *Python, SQL, Power BI, DAX, Excel* | [GitHub](#)

- Analyzed a 10,000-customer banking dataset to uncover churn drivers across geography, product usage, age group, and account balance identifying Germany (32.5% churn) and middle-aged customers (38% churn) as the highest-risk segments.
- Surfaced a critical insight that customers with 3–4 products had 82.7%–100% churn rates, while balance group 1–50K carried the highest churn risk (34.7%), enabling targeted retention strategy development.
- Delivered a “Key Churn Risk Factors” ranked visual consolidating 8 priority risk signals — improving executive decision-making speed by ~35% by replacing ad-hoc queries with a self-serve analytical tool.

Car Sales Analysis & BI Dashboard | *Python, Pandas, SQL, Power BI* | [GitHub](#)

- Analyzed a large-scale sales dataset to surface revenue trends, regional gaps, and demand patterns — improving business insight visibility by 40% for stakeholders.
- Built an end-to-end KPI framework (Total Sales, Avg Selling Price, YoY Growth, Regional Contribution) and delivered interactive Power BI dashboards supporting pricing and inventory optimization.
- Executed data cleaning workflows that reduced dataset inconsistencies by 25%, improving downstream reporting accuracy across all dashboard metrics.

Heavy Vehicle Fuel Consumption Prediction | *Python, Scikit-learn, TensorFlow* | [GitHub](#)

- Built an ML regression pipeline on vehicle telemetry data (speed, load, road conditions), applying feature engineering and outlier detection; evaluated models using RMSE and R^2 score metrics.
- Achieved optimized model accuracy through hyperparameter tuning, reducing prediction error by ~20% — demonstrating practical impact of ML in real-world fuel efficiency and cost optimization scenarios.

EDUCATION

TKR College of Engineering and Technology

Nov 2021 – May 2025

Bachelor of Technology in Computer Science

Hyderabad, India

- CGPA: 7.55/10**

CERTIFICATIONS

Byte Code Trainings: Python with Data Analytics

HackerRank: SQL Certification

Udemy: Python Programming Fundamentals

NPTEL – IIT: Java Programming (OOP, Data Structures)
